Horticultural market in Poland

The area of horticultural crops in Poland is over 400 thousand hectares, on which Polish gardeners produce almost 10 million tons of fruit and vegetables every year.

Poland is number one in the EU in the production of fruits such as:

33% EU

70% EU

64% EU

15% EU

70% EU

95% EU

23% EU

Poland is also the third largest producer of vegetables in the EU with a production of 5 million tonnes, which means that every 10th vegetable in the EU comes from Poland.

We are the first in the EU in the production of red beet, the second in the production of cabbage, the third in carrots and the fourth in the production of onions and tomatoes.

As part of the New Common Agricultural Policy for 2023-2027, EUR 24 billion will be allocated to support and develop Polish agriculture.

The previous edition gathered exhibitors from 15 countries, including companies from Italy, the Netherlands, Spain, Belgium, Germany, Austria, the Czech Republic, Lithuania, Serbia, Ukraine, the United Kingdom, as well as New Zealand and Mexico
